SUPPLIES NEEDED: DECORATIVE

BASIC VERSION:

Scissors

Mini Hole Punch

Mini Brads (3mm)

Double Sided Tape/

Craft Glue

VERSION:

Scissors

Mini Hole Punch

Mini Brads (3mm)

3/16" hole punch

3/16" Grommets and

Grommet Tool

BASIC VERSION:

Cut out fan pieces and holder along the red lines. and slice the short line in the middle on 7 of the back fan pieces.

Place front and back of fan piece together. blank sides facing one another.

With a mini hole punch - punch a holes at each of the three X marks on the back side of the fan pieces.

Use brads in the top 2 holes to attach the two pieces. (brad end on the front side.)

Starting with the fan piece without the slit on top take a second piece (both back sides facing you) and thread them on a brad through the bottom holes.

Slide the left side of the top piece into the slit on the bottom piece.

Repeat until all eight pieces are threaded on the bottom brad.

use doublesided tape or craft glue under the left side edge of the piece to hold them

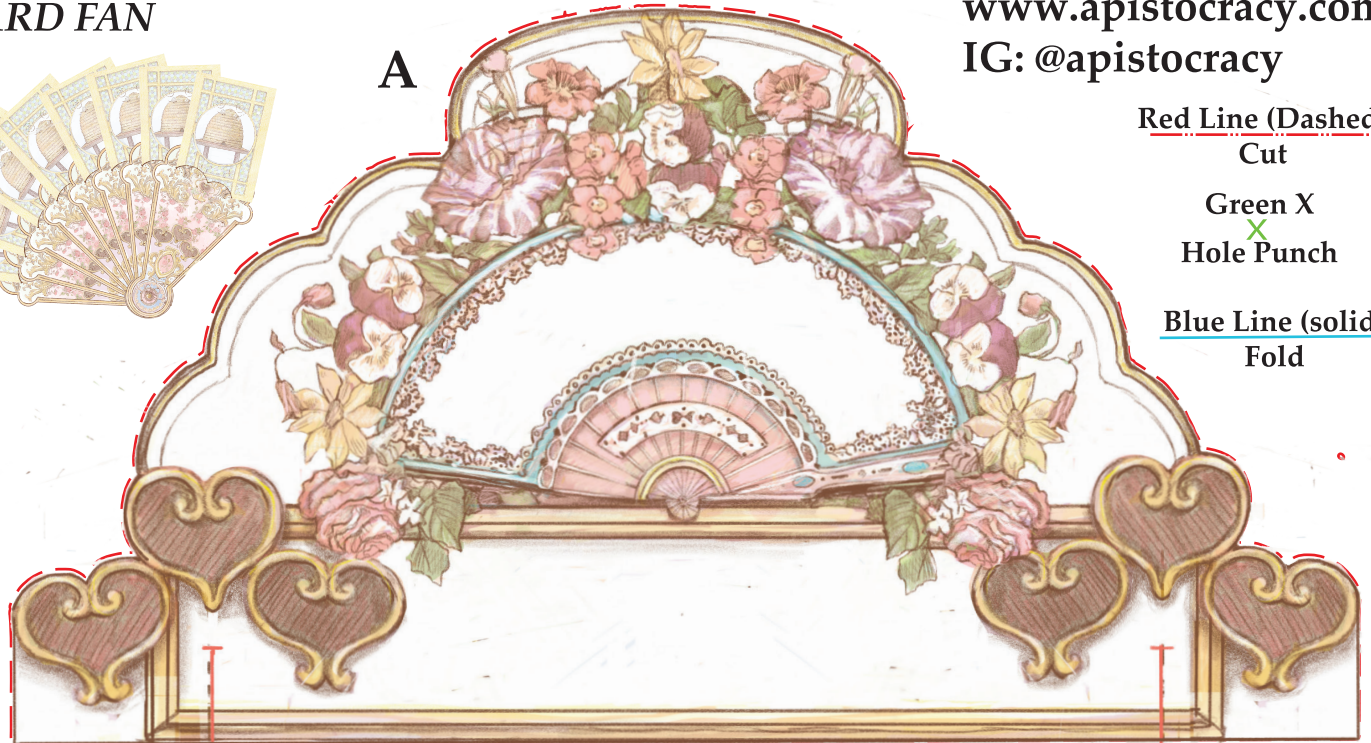

DECORATIVE VERSION VARIATION:
follow above steps except instead of using brads to join the front and back at the top 2 holes use grommets.

DO NOT USE GROMMETS AT BOTTOM.
(A brad is still used to attach them all at the bottom.)

Instead of using tape/glue to hold the pieces in place use ribbon. With the fan back facing you thread the ribbon in the far right hole from behind. Thread through next hole and pull out the left side of the piece. Continue till the end and flip over to repeat on other side. Tie the 2 ends in a bow when they meet.

A

Red Line (Dashed)
